Floor Plan Notes

1. All partitions are Type-A U.N.O.
2. All interior plan dimensions are to face of stud. U.N.O.
Column dimensions are to centerline of column.
3. Where no dimension is given at the door locations, use layout as dimension as indicated.

The diagram illustrates a door swing within a wall opening. A curved line represents the door's path, starting from a vertical line indicating the door's closed position. A dimension line with arrows at both ends is drawn perpendicular to the door's swing path, labeled with the number '6'. This indicates a 6-foot swing radius or clearance. The wall is represented by two parallel vertical lines, and the floor is indicated by a horizontal line at the bottom.

4. Center all doors and cased openings on hallways and closets. U.N.O.
5. Contractor shall provide and install all blocking and bracing for casework, accessories, etc.
6. See reflected ceiling plans for soffit and bulkhead locations.
7. Slope all exterior concrete pads $1/8"$ away from building.
